

Globální zpráva o zdraví v EU

Mezinárodní projekt EUGLOREH

Mgr. Jiří Holub

EUGLOREH

grant DG SANCO No. 2005115

- Jde o 3letý projekt Evropské komise, který byl zahájen v listopadu 2005 a ukončen v březnu 2009.
- Koordinátorem projektu bylo italské ministerstvo zdravotnictví a Italský národní institut zdraví (Italian National Institute for Health (ISS)).
- Základem „Zprávy“ je zejména srovnání ukazatelů zdravotního stavu a jeho determinant v 27 členských zemí Evropské unie, v Chorvatsku, Turecku, Norsku a na Islandu.

THE PROJECT

European Conference for the presentation of "The Report on the Status of Health in the European Union"

Italian National Institute for Health (ISS)

Viale Regina Elena, 299 - Rome (Italy)

20 March 2009

"The Report on the Status of Health in the European Union" is the final deliverable of the EUGLOREH project, which has benefited from the collaboration of the health authorities or institutions from all EU Member States, Croatia, Turkey, Iceland and Norway, and of major intergovernmental, International and European Organizations and Agencies. Moreover, more than 170 European experts have provided their knowledge and analysis of the many health subjects dealt with in the Report.

The presentation of the Report will provide an opportunity to debate on its contents and to share its messages with the participants in the Conference.

Organizations and associations with EU-wide interest in health are invited to attend the Conference.

The Project

Introduction and general objective:

The general objective of the project is the production of a "Report on Health in the European Union" (hereinafter mentioned as the Report) extending from 1998 till the most recently available data. This Report is intended to be a reference publication providing general information on health status of the European population and on associated time-trends. Moreover, the Report is also intended to provide a valuable tool for the European Commission, national policy makers and other stakeholders to monitor impacts of main health interventions and policies. This project intends to be respectful of the data gathering systems existing at national level or in other contexts and there is no implication that such systems should be harmonized or modified. Selection of indicators and data sources will be preferentially based on the work of current and past EC funded projects. This project aims at developing and applying a consensus methodology and mechanism. The Ministries of Health of the EU Member States, EFTA and Candidate Countries, Community Institutions, International Organizations and selected stakeholders will be involved in its preparation. The project will carry out an evaluation of the Report as to its capacity to fulfil the expectations and needs of different categories of readers.

Contents, objectives and format of the Report:

The format, contents and objectives of the Report will be defined through a consensus meeting of the associated partners, Community Institutions and International Organizations (such as EUROSTAT, ECDC and WHO) and consultation with the co-ordinating and advisory structures of the Community health information and knowledge system. The present project proposal is based on a Table of Contents, which should however be considered provisional pending its adoption in the first meeting of the partners.

Project Partners

Country	National Partners
AUSTRIA	Ministry of Health and Women, Wien
BELGIUM	Scientific Institute of Public Health, Brussels
BULGARIA	Ministry of Health - Directorate International Cooperation and European Integration, Sophia
BULGARIA	NCHI-National center of health information - Sofia

Česká verze souhrnu

- Překlad zajistil ÚZIS ČR
- Bylo to dost náročné
- Národní verze umožňují rychlý přehled o koncepci a obsahu všech zpráv.
- Obě další zprávy obsahují další tabulky, grafy a texty.
- „Full report“ obsahuje i mnoho doplňujících podklad a článků, ze kterých zpráva vznikala.
